

AGREGATE FRIGORIFICE PENTRU ECHIPARE AUTOUTILITARE TRANSPORT ALIMENTE – KONVEKTA

Autoutilitare tip VAN - refrigerare

Model - FK 3050 – cool and fresh

Then, keep it Konvekta by acquiring the new Transport Refrigeration Units FK 3050 and TK 4050. The FK 3050 is built and designed for the transportation of perishable goods, while the TK 4050 is extremely well suited for the transportation of frozen goods. Due to the completely pre-assembled front-wall condensers, installation is cheap, easy and standard.

These units do not handicap nor are affected by the tilting of vehicle's cabins for maintenance work and they offer a high reliability by a brushless fan motor. That is not all, they are not only light weighted, extremely gentle and present a pretty winning design but go an extra mile with an increased weight carrying capacity and a conspicuously powerful and technically designed refrigeration unit.

Technical Data

Type:	FK 3050
Cooling capacity driving cooling (+6°C*/+30°C**) [W]:	3.600
Cooling capacity driving cooling (+0°C*/+30°C**) [W]:	3.000
Cooling capacity standby (0°C*) [W]:	1.650 standard/1.900
Evaporator-Air flow rate [m³/h]:	2.450
Current intake at 12V/24V [A]:	30/20
Weight driving cooling [kg]:	68
Weight driving-/standing cooling [kg]:	98
Condenser	DKD 324
Condenser L/W/H [mm]:	425/1.398/530
Evaporator	VD 4015
Evaporator L/W/H [mm]:	738/1.120/185
Refrigerant	R134a
Options:	
Hhot gas heating, integrated Standby-unit	
*Inside temperature **Outside temperature	

Your Advantages:

- Profitable efficiency by energy-saving direct drive via vehicle engine
- High loading capacity by special lightweight-construction
- Low installation costs by high pre-assembly degree
- High reliability by brushless evaporator fan
- Flexible field of application by optional available heating
